# Audit Findings

## Audit Narrative

*The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.*

The PREA audit for Alcohol and Drug Addiction Partnership Treatment and Burnett Intensive Services (ADAPT/BIS) Halfway House was conducted on February 13-14, 2017 in Cincinnati, Ohio. The facility supplied the auditor documentation relevant to showing compliance with each of the standards. This documentation included the pre-audit questionnaire, policy and procedure, facility floor plan with camera coverage marked, MOU's, staffing plan, and other PREA forms. The auditor received this information and additional documentation while conducting the onsite visit.

During the audit, the auditor was provided a private area in which to complete work and interviews. The auditor conducted formal and information interviews of staff and residents. During the tour, the auditor noted PREA audit notices posted in both resident and staff areas in conspicuous places. The notices included the name and address of the PREA auditor and the date posted was approximately 6 weeks prior to the on-site audit. Also posted throughout the facility were postings that informed residents how to report an allegation, including anonymously, phone numbers and address of the emotional support agency, and for staff a posting of the agency's coordinated response plan.

Sixteen residents from the three housing units were interviewed. There were no residents or staff that requested to speak with the auditor. During resident interviews, they were asked about their experience with PREA education, allegation reporting, communication with staff, safety, restrooms, knock and announcements, grievance procedures, pat downs, PREA posters and other handouts, and the zero tolerance policy. Vulnerable residents were asked about their safety and offering of counseling services and residents who have a disability stated the disability did not impair the resident's ability to fully participate in the facility's PREA education program. The facility did not have residents who have limited English proficiency or residents who reported an allegation. All residents reported feeling safe in the facility.

Staff interviewed included specialized staff. This includes the PREA Coordinator, Director of Program Operations, Human Resource Manager, Regional Directors, and Program Director. The auditor was able to review SANE of Butler County MOU and website to confirm the scope of their services provided to residents at the facility. Random staff from each of the three shifts were interviewed. These staff were asked about PREA training, how to report, whom to report, filing out reports, investigations, conducting interviews, follow-up and retaliation monitoring, first responder duties, and the facility's coordinated response plan.

After a brief opening, the auditor toured the facility. The tour consisted of examining all dorms, bathrooms, group rooms, outside recreation areas, day rooms, operations post, utility areas, kitchen, and maintenance areas. The auditor gave a closeout that included some of the immediate findings.

## Facility Characteristics

*The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate, resident or detainee population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.*

ADAPT/BIS is a halfway house located in Cincinnati, Ohio that serves adult male and female felony offenders. The facility is located in a multiuse building and has three distinct housing units (one male ADAPT unit, one female ADAPT unit, and one male BIS unit) that can house a total of 113 clients (the census during the audit was 91). The third floor houses the male and female ADAPT units. The second floor houses the male BIS unit. The three units' floor plans are the same. To access the facility, one must enter the lobby area where building security mans the front desk. A phone is provided so visitors and clients can request a staff member come escort them to one of the housing units. In order to access one of the housing units, one must have a key to the floor or elevator. Another key is needed to access the unit, and once on the unit, clients are subject to a pat search that is on camera.

The facility is equipped with 53 surveillance cameras (27 ADAPT/26 BIS) which can record and play back 14-30 days. The cameras are placed strategically throughout the interior and exterior of the building. There are also multiple security cameras in the building that are operated/viewable by building security. The facility has identified areas that can be considered vulnerabilities and have developed a plan for monitoring these areas until electronic monitoring can be added. Cameras can be found in the hallways, dayrooms, laundry rooms (ADAPT), dining hall, exercise room, and dorms. All exterior entrance points and the rec yard are also monitored by cameras. The Activity and Security Monitors (ASM) are required to conduct a circulation round every thirty minutes and a head count three times a day. Clients are required to report to their rooms for head count.

Entering into the housing unit, there is a RA security office that is staffed at all times. This office is located off the dayroom. The unit is square shaped with offices, dorms, group rooms, library, lounge/exercise room, laundry room, bathrooms, and rewards room are along the perimeter of the wing. On the ADAPT units, dorm room doors are kept open during programming hours. While on the BIS unit, dorm room doors are kept locked during programming hours. Dorm rooms have 8-10 beds and are arranged to provide clear line of site views. All of the dorm rooms on all three housing units have a camera. Clients are required to change inside the bathroom and be properly dressed in common areas.

The clients in the three housing units have minimal interactions with clients from the other units. The clients share a court yard, dining area, and kitchen but do not use these areas at the same time. When clients are moving off the unit, they are required to be quiet during travel time. The facility has kitchen staff to operate the kitchen; however, occasionally BIS clients will help serve under staff supervision. Clients have scheduled supervised time on the outdoor patio area.

Clients that have been given a classification of vulnerable would be housed in one of the dorm rooms that offers the most visibility, security, and on camera. The facility has a locked shower room on each of the housing units in order to provide transgender/intersex clients an opportunity to shower privately.

The bathroom is designed to offer privacy for clients (see standard 115.215 to see full bathroom description).

As part of the Talbert House residential corrections program, the facility focuses on successful transition from correctional supervision to community. The facility offers several programs designed to successfully reintegrate offenders back into the community. Reentry Services include addiction treatment, medication-assisted treatment, trauma, life skills, vocational services, and criminal thinking. The organization has a culture of innovation that thrives on the creation of services that meet clients' needs. Treatment services are researched based, best practices. The staff provide a secure, supervised, and structured living environment that empower clients to change.

### Summary of Corrective Action (if any)

The facility did not need to address any standard with corrective actions. The agency has implemented corrective action plans from other facilities under its umbrella to address any previous deficiencies. The overall impression left with the auditor was the agency as a whole and the facility specifically take PREA compliance seriously. It is of the utmost importance to administration and facility leadership to provide a safe and secure environment that promotes change.

The agency has a policy requiring each facility complete a staffing plan that provides for adequate levels of staffing and where appropriate video monitoring equipment to protect clients against sexual misconduct. The staffing plan reviews the physical elements of the building including the placement of cameras and identified blind spot areas; plans for prevention and detection including coverage of blind spot areas, requiring staff to have blinds or doors open when clients are in the office, and proper

training to ensure staff are conducting proper and timely tours throughout the facility; and ensuring proper staff to client ratios and that staff have been properly trained on the PREA standards. The plan also reviews the number and types of allegations during that year and ensures all recommendations have been implemented.

The development of the plan included the input of the PREA Coordinator and the Associate Directors, Regional Director, Program Director, and other key staff members. The auditor has reviewed the agency's written policy concerning what information is to be contained in the staffing plan and the number of staff members required to operate each shift.

The facility has a total of 53 cameras (27 ADAPT/26 BIS) that aid in the supervision of clients. The facility is located in a multi-use building. The security at the lobby entrance has camera views of common areas such as hallways and the outdoor patio area. The cameras record to a digital server and are capable of a 14-30-day play back. Staff, clients, and visitors must enter into the main lobby area. One must have a key to access the elevator or stairwell for the facility. Visitors and clients will use the lobby phone to contact staff for an escort onto the floor.

The plan is required to be reviewed annually.

There have been no reports of deviations to the staffing plan.

#### Auditor Overall Compliance Determination

- Exceeds Standard** (*Substantially exceeds requirement of standards*)

#### Instructions for Overall Compliance Determination Narrative

*The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.*

Per agency policy, the facility does not conduct cross gender or body cavity searches. The facility houses both male and female offenders but does not allow for cross gender pat searches. All pat downs are completed in camera view. The facility does not conduct strip searches unless prior approval from administration has been granted. All employees are trained on the proper techniques to a pat down search during orientation and again annually.

The facility allows for clients to shower, perform bodily functions, and dress in areas not viewable to staff. The facility has three distinct housing units, one male ADAPT unity, one female ADAPT unit and one male BIS unit. The clients within each housing unit share the bathroom. The floor plan for each housing unit is identical. Each unit has two bathrooms plus a single use shower room. The bathroom contains two toilet stalls with doors and a shower area with a multiuse shower and changing area. There is a shower curtain that covers the shower area and the entrance to the bathroom has a solid door. The second bathroom in each of the housing units contains a single use shower and changing area that is covered by a shower curtain. There are two toilet stalls with door. The entrance to the bathroom is covered with a solid door. The shower room on each floor has a tub/shower combo and must be opened by staff. This bathroom is available for transgender/intersex clients to shower privately. All staff knock and announce their presence before entering the bathroom. The dorm room doors are required to be open during programming hours. All dorms in the three housing units are equipped with cameras. Clients are informed that they must change in the bathroom and be properly dressed in all common areas.

The facility has not housed a transgender or intersex client. The agency has developed a transgender housing policy that has identified ways to manage, house, and secure a transgender or intersex client safely. The client will be consulted as to their needs for privacy concerning personal hygiene and preferences on who would conduct pat downs. The agency has a policy for professional, respectful transgender/intersex client pat downs. No transgender/intersex client would be searched for the sole purpose of determining genital status.

During interviews with staff, all indicate that they have been trained properly on how to conduct a variety of pat downs. The staff members felt comfortable with their training and no issues have been reported concerning the pat down process.

During interviews with clients, the auditor noted that all clients reported that the pat downs were conducted professionally and respectfully. At no time did a resident complain that they were uncomfortable in a sexualized way during a pat down.

The agency has a policy that calls for the reasonable accommodations for clients that allow for them to be able to benefit from program services. These services are for clients who may have a physical, mental, or cognitive disability or for clients who may be limited English proficient. The facility works with community partners to address specific individual needs so that clients can benefit from all aspects of the facility's efforts to prevent, detect, and respond to incidents of sexual abuse and sexual harassment.

The facility staff are instructed to ensure that all aspects of PREA are communicated to all clients regardless of mental, physical, or cognitive disability or language barrier. If there is not a qualified staff member to assist the client, a community partner will be contracted to aid the client in understanding agency rules, PREA, and other regulations. The agency currently has partnerships with Affordable Language Services, and Hearing, Speech, and Deaf Center of Greater Cincinnati.

At no time will another client be used for interpretive services unless a delay in services would compromise the client's safety, the performance of first responder duties, or an investigation.

Talbert House has a policy that prohibits any of the facilities it operates to hire or promote staff (including contractors and volunteers) that have been convicted of sexual abuse in a prison, jail, lockup, or community confinement facility, nor will they hire or promote anyone who has been civilly or administratively adjudicated to have engaged in sexual abuse in the community. The facility conducts a NCIC/NLETS background check on all employees and volunteers. Staff members who work in a facility that houses federal Bureau of Prison offenders will automatically receive a background check every five years as part of the contract renewal. All employee at facilities that do not house federal offenders, will have a background check completed every five years. The HR department conducts annual file reviews and will alert the Program Director of each facility when an employee's background check is due. A random review of 23 employee files shows that all employee background checks are up to date. The agency documents all contact with previous employers.

The applicant interview requires potential employees to reveal if they have been convicted of sexual abuse in a prison, jail, lockup, or community confinement facility or convicted of engaging or attempting to engage in sexual activity in the community by force (over or implied) or coercion, or if the victim did not consent or was unable to consent; and if they have been civilly or administratively adjudicated to have engaged in the above activity.

The agency also has a PREA acknowledgement form that all staff sign. The form reviews the agency's zero tolerance policy and all expectations under the PREA guidelines including the continuing affirmative duty to report any allegation against the employee. New employees are also trained on ethical and professional conduct and scope of practice, prevention of personal or familial relationships with clients, and professional boundaries.

Employees who would like to move up within the agency will have to submit a letter of interest to the HR Department. The HR Department will assess the eligibility of the employee by reviewing performance appraisals, disciplinary records, and personnel action reports. Employees who have a disciplinary report that includes a substantiated allegation of sexual harassment will not be considered for the position.

The auditor reviewed 23 random employee files. The review included on boarding documentation, employment application, reference checks/verification, interview forms, disciplinary records, training records, background checks, employee handbook, code of conduct/ethics acknowledgement, and promotions.

The auditor interviewed the Human Resource Generalist concerning their method for ensuring all employees receive their initial and five-year background checks, the process for promotions, reference checks, reporting substantiated allegations to other facilities upon request, and the onboarding process.

The facility has a MOU with the City of Cincinnati Police Department, the agency who has the legal authority to conduct such investigation. The agency has posted its policy concerning conducting an administrative and criminal investigation on its website (<http://www.talberthouse.org/resources/prea-5/>). During this audit cycle, the facility has had one allegations which occurred on the BIS unit.

Investigation #1: This was a verbal client-to-client allegation of sexual harassment. The allegation was administratively investigated and determined to be unsubstantiated. There was no criminal activity so no referral for a criminal investigation was necessary. The incident took place in the laundry room where there is a window in the door but there are no security cameras. Administration restricted the laundry room hours to better monitor this area.

During the course of reviewing investigation report and conducting interviews it was noted by the auditor that the investigation was handled properly and had the correct outcome. The agency as a whole has a total of twenty-one trained investigators.

All residents receive information at intake on the facility's zero tolerance policy. This information is reviewed with the client to ensure that each client knows how to report incidents or suspicions of sexual abuse or sexual harassment; their right to be free from sexual abuse, sexual harassment, and retaliation; and how to keep themselves safe while in the facility. If a resident is limited in English proficiency or another disability that prevents, normal communication, the facility will work with outside agencies to ensure each client can benefit from the agency's efforts to prevent, detect, report, and respond to allegations of sexual abuse and sexual harassment (see standard 115.216).

At intake clients will receive brochures and other documentation that provides phone numbers and addresses to reporting and supportive agencies. This information is also documented throughout the facilities on posters located in conspicuous places. A more formal client education concerning their rights and responsibilities under the PREA standards is given at a later time.

The facility provided the auditor with the documentation that is given to clients, and noted the posters located throughout the facility.

In total, sixteen clients were interviewed by the auditor. The clients acknowledged receiving PREA education training and informational brochures from the facility. All clients reported feeling safe in the facility and comfortable enough with staff to report an allegation if necessary. Clients were aware of the PREA postings and the toll free phone numbers available if they needed to contact a hotline or other supportive services.

The agency has a policy concerning specialized training for PREA administrative investigators. All criminal investigations are referred to the local legal authority for investigation. ADAPT/BIS has staff members that have received appropriate training on how to conduct an administrative investigation. The training included techniques for interviewing sexual abuse victims, proper use of Miranda and Garity Warnings, evidence collection in a confinement setting, and required evidence to substantiate a case for administrative or criminal investigation referral. The PREA coordinators has been trained as an administrative investigator trainer and provides support and guidance to facility investigators.

The facility provides limited onsite medical and mental health services. The medical and mental health staff have all received the appropriate contractor and specialized PREA training. Clients needing services due to a PREA related situation/allegation would be referred to community resources. Medical services would be provided to residents by University Hospital. The facility has an MOU with this hospital to provide forensic examination services should a resident be sexually abused or assaulted while at the facility. Mental Health or Victim Advocate services would be provided by SANE of Butler County or YWCA Rape Crisis.

This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.*

All clients are screened within 72 hours from intake to assess their risk of vulnerability or abusiveness. The screening tool used includes all required criteria per the standard to accurately assess the client’s risk. The screening is completed by a Resident Advisor and a rescreen is completed by the case manager before the client reaches 30 days in the facility. The staff required to complete this form have been trained on how to complete the assessment appropriately. Client’s assessments are referred to the clinician for further review and/or classification if a client answers in the affirmative to any of the questions. The clinical supervisor also reviews assessments for accuracy. Per policy, a client cannot be disciplined for refusing to answer assessment questions.

Interviews with clients confirmed that they received an assessment at intake and a rescreening at a later date.

Interviews with staff confirmed they understood how to use the screening tool and kept all information confidential. The agency provides case managers with specific PREA training related to their responsibilities as a case manager which includes how to accurately complete an initial assessment and rescreen.

The auditor noted that during a PREA audit for another facility in the Talbert House umbrella, the staff completing the screening form was not using their own perception when assessing a client’s LGBTI status. ADAPT/BIS staff have received the corrective action measures on this and have been assessing clients correctly.

All clients who receive a classification as vulnerable based on their PREA screening assessment will be housed in a bed/room that provides the maximum supervision. Staff would be aware of their status and ensure the safety and security of the client without knowing details of the assessment.

Besides housing, the information obtained in the assessment may be included in the client's individual case plan. The client and the case manager would create goals to work on while in treatment or the case manager may make community referrals for treatment. Clients could be referred the mental health clinician or community mental health agencies.

The facility has developed an appropriate plan to house transgender/intersex clients safely. The case manager would discuss with a transgender/intersex client all available safety options and allow their views of their own safety to aid in determining housing and treatment options. Clients would be able to receive the same treatment benefits while being house in a manner that allows for safe housing, work, and program assignments.

During the interview, the Associate Director of both ADAPT and BIS were able to clearly discuss the facility's plan to keep potential victims away from potential abusers during work, education, or program assignments. At this time, the facility does

not have a client that has identified as transgender or intersex.

The clients at ADAPT/BIS have multiple ways of reporting sexual abuse or sexual harassment. Posters throughout the facility indicate how clients can report to Talbert House staff as well as how to report to an outside agency. Interviews with the clients indicate that they are aware of all means of reporting and that they could report anonymously. They received the information at intake, during orientation training, and in case manager meetings.

The facility allows for free calls to the reporting entities. The phones in each of the housing units have free access to the PREA hotline. The facility also has a care and concern box in which a client can leave a written PREA allegation and remain anonymous.

All residents received information at intake and in their handbooks regarding PREA reporting. Staff received information on how to privately report during staff training.

The one allegation during this audit cycle was a client verbal report to staff.

(N/A if agency is exempt from this standard.)  Yes  No  NA
- At any level of the administrative process, including the final level, if the resident does not receive a response within the time allotted for reply, including any properly noticed extension, may a resident consider the absence of a response to be a denial at that level? This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.*

Talbert House has a grievance policy which does not assess a time limit for filing a grievance alleging sexual abuse or sexual harassment. The agency will respond to a grievance within five working days and has several levels of appeals. Should staff need more time to investigate or respond to the client, staff will notify the client of the extension and provide a date a decision will be made. Clients are informed that they are not required to use the grievance system in order to make an allegation of sexual abuse and sexual harassment, and that there are no time limits to reporting. Clients are also notified that third party sources can assist in the grievance process and that they can file a sexual abuse or sexual harassment grievance on behalf of another client. Grievances forms are available to clients and can be returned to any staff member or placed in the care and concern box (a locked box which allows clients to make written allegations).

During random client interviews, each responded that they were informed of the grievance process at intake. The grievance policy is also outlined in the client handbook which each client has verified they received at intake. No client interviewed has used the grievance system to report an allegation of sexual abuse or sexual harassment. The auditor discussed with the clients the response times to any type of grievance and those who have filed various grievances received a response from the agency within the specified time limit.

The facility's Associate Director and Operations Supervisor reviewed the grievance process with the auditor and the various levels of appeals available to clients. Clients who allege substantial risk of imminent sexual abuse will be immediately protected. The victim can be moved to another room or facility or the abuser can be moved to another room or facility. Agency practice is to place any staff member who is the subject of a sexual abuse or sexual harassment allegation on administrative leave.

The agency has a policy that requires all staff to immediately report any knowledge, suspicion, or information regarding an incident of sexual abuse, sexual harassment, or retaliation, including third party and anonymous reports. The staff have been given instruction on how to document the report and limit access to that information, and to only share that information with staff in order to make treatment, investigation, or other security decisions. All allegations of sexual abuse or harassment are referred to the PREA Coordinator for investigation.

Staff interviewed, including line staff and facility leadership, understood their duty to report and were trained appropriately on the agency's PREA reporting policies. Staff indicated that they would have no trouble reporting any allegation or suspicion of sexual abuse, sexual harassment, or retaliation even if it was against another staff member.

All staff members who have licensure are required to inform residents of their status and the limits of confidentiality. These staff members maintain their duty to report any allegation made to them.

The facility does not accept any resident that is under the age of 18 and does not have a duty to report to child protective services. The State of Ohio does not require institutions or facilities licensed by the state of Ohio in which a person resides as a result of voluntary, civil, or criminal commitment to report to adult protective services (Chapter 5101:2-20 and 5101:2-20-01).

The facility has a plan to protect clients from imminent sexual abuse. The facility has several dorm units that a client can be moved to in order to facilitate protection. If necessary, Talbert House has several facilities throughout Cincinnati. The facility could utilize one of the other facilities if necessary to protect a client from imminent sexual abuse. The agency has a practice of placing a staff member on administrative leave if they are the subject of a sexual abuse or sexual harassment investigation.

An interview with the Associate Directors and PREA Coordinators discussed the process for ensuring client safety and making a move to another facility if necessary. The facility has not had an allegation against a staff member during this audit cycle. The alleged abuser in the one allegation was removed from the facility to be assessed for mental health issues.

The auditor was left with the impression from the interviews with clients and staff that client safety was paramount to the staff and that any necessary changes that would not jeopardize the safety and security of the facility would be made.

The agency has developed a Sexual Abuse, Sexual Assault, Sexual Harassment Reporting Form to walk staff members through the coordinated response plan. The plan lists the required steps and is posted in the Compliance Manual located at the main post. The steps listed are specific and detailed enough for staff to follow in the event of a sexual abuse/sexual assault incident. The Associate Director will follow up with the local authorities until completion of the investigation. An administrative investigation will not take place until after the criminal investigation is completed or in conjunction with the local legal authority.

The staff will offer the victim access to a forensic medical exam at University Hospital, victim advocate services from YWCA Rape Crisis or SANE of Butler County, and if the advocate services are not readily available a qualified staff member who has been trained as an emotional support person will assist. The advocate will accompany the victim to the medical exam and any investigative interviews. The facility conducts administrative investigations but does not conduct criminal investigations. Criminal investigations would be completed by City of Cincinnati Police Department. The facility has one allegation of staff sexual misconduct during this audit cycle.

Investigation #1: This was a verbal client-to-client allegation of sexual harassment. The allegation was administratively investigated and determined to be unsubstantiated. There was no criminal activity so no referral for a criminal investigation was necessary. The incident took place in the laundry room where there is a window in the door but there are no security cameras. Administration restricted the laundry room hours to better monitor this area.

The facility has several trained administrative investigator and the PREA Coordinators are a trained investigator as well.

The auditor sat with the PREA Coordinator and the PREA Investigator to review the process for how the investigator completes an investigation. The investigator discussed the review of any camera footage if available, interviewing the alleged victim, witness, and abuser, and review if there has been previous complains made against the suspected abuser. At no time does the investigator use status as a client or staff member to determine credibility. The facility does not use a polygraph examination as part of an administrative investigation. All allegations will receive an administrative investigation regardless of whether the alleged victim or abuser is no longer employed or in the control of the agency.

All allegations are documented and reviewed by the Risk Management Committee. The report is comprehensive in the information it collects from the beginning to the disposition of the allegation. If a Sexual Abuse Review Team meeting and retaliation monitoring is necessary, the investigator will denote the time of the SART meeting and who is responsible for retaliation monitoring.

The PREA Coordinator confirmed the retention schedule of for as long as the person is incarcerated or employed with the agency plus five years. The Associate Director is responsible for maintaining contact with the legal local authority when the investigation has been referred for criminal investigation.

Talbert House outlines its progressive disciplinary plan in its employee handbook. A review of the handbook states that any staff member found to have engaged in sexual abuse will be terminated. Termination or resignations by staff will not void an investigation and any criminal activity will be reported to the legal authority and to any relevant licensing agency. Policy also indicates that the agency will notify law enforcement or any relevant licensing boards of any terminations or resignations based upon violations of the agency's client sexual abuse and sexual harassment prevention policy when such behavior is criminal in nature.

All staff interviewed understood that anyone engaging in sexual harassment will be disciplined according to agency policy and that they would be terminated for participating in sexual abuse. Staff indicated that they are required to report any suspicion to their immediate supervisor and that they would not have any issue reporting a coworker for violation of the zero tolerance policy.

The auditor reviewed agency policy, the employee handbook, and interviewed the PREA Coordinator and Human Resource Generalist to confirm the disciplinary process for employees found to have substantially engaged in sexual harassment or sexual abuse against residents. All agency leadership stated that any employee found to have engaged in sexual harassment will be immediately disciplined up to and including termination from the facility and employees found to have engaged in sexual abuse will be immediately terminated and law enforcement would be notified.

There were no allegations against a staff member during this audit cycle.

The facility has an appropriate policy that disciplines clients for a substantiated allegation of sexual abuse or sexual harassment or for a criminal finding of guilt for sexual abuse or harassment. The facility has not had an allegation of client on client sexual abuse or sexual harassment, nor have they had a guilty finding in a criminal investigation of client on client sexual abuse or sexual harassment during this audit cycle.

The client handbook clearly defines the agency's rule violations and the possible sanctions. Each client is given a handbook at intake and staff reviews the handbook, specifically the disciplinary policies, with each client.

During client interviews, all clients stated that they received a handbook at intake and that staff reviewed the disciplinary policies with them. Each client was able to identify the sanctions that accompany a substantiated allegation of sexual abuse or sexual harassment or a criminal finding of guilt.

The facility had one unsubstantiated allegation against a client during this audit cycle. The investigation determined that the alleged abuser may have some mental health issues. The client was taken to a mental health hospital.

After an incident of sexual abuse or sexual assault, victims are offered unimpeded access to emergency medical treatment and crisis intervention services. Qualified practitioners who would determine the appropriate scope of services would provide these services. Medical services would be provided by University Hospital, and mental health, crisis intervention, or advocacy services would be provided by SANE of Butler County or YWCA Rape Crisis. Clients would be given timely information about sexually transmitted infections prophylaxis and female clients are offered timely access to emergency contraception. All services are offered free of charge to clients.

The victim's mental health will be evaluated by the agency's clinical staff. The clinician will update the PREA Coordinator on the victim's need for outside services.

Talbert House staff are trained on the appropriate response to an incident of sexual abuse or sexual assault during monthly staff meetings.

A review of allegation investigation forms shows that staff would offer clients the opportunity to receive medical and mental health care if appropriate.

The treatment includes testing for sexually transmitted diseases. Treatment is offered to all known client to client abusers within 60 days of learning such history. All treatment is offered free of charge. The facility has not had a report of any known client to client abuser.

Staff are trained on the first responder duties and coordinated response plan. This plan outlines how staff is to offer unimpeded access to both emergency and ongoing medical and mental health care. Ongoing medical and mental health care will be at the discretion of the medical provider and is again at no cost to the resident. Female clients who are victims of sexual abuse will be offered pregnancy test, and if pregnancy results from the sexual abuse, clients will receive timely and comprehensive information about and timely access to all lawful pregnancy related medical services.

The PREA initial screening and rescreening along with other intake documentation are reviewed to determine if a client has abused others while in a correctional setting. If a client indicates or has a report that indicates that he has in fact abused another client while in a correctional setting, the agency's clinician would meet with the client to determine if additional treatment or a referral for community treatment is necessary.

Talbert House has an agency policy on a review of all substantiated or unsubstantiated allegations of sexual abuse within 30 days of the conclusion of the investigation. The review team includes the PREA Coordinator, Facility Associate Director, Facility Director, Clinical staff, and any other staff member deemed necessary.

The team would review agency policies and practices, training, staffing plan, and physical vulnerabilities. This includes whether a change in policy or practice will better prevent, detect, or respond to sexual abuse; if the incident or allegation was motivated by race, ethnicity, gender identity, gang affiliation, or any other group dynamic; if any physical barriers in the area enabled the abuse; adequacy of staffing levels; and whether monitoring technology should be deployed or augmented to supplement supervision by staff. The agency's Risk Management Committee will review for any significant issues that may need to be addressed agency wide.

ADAPT/BIS has not had an allegation that would require a SART review during this audit cycle. The facility staff still reviewed the circumstances that may have facilitated the incident and made changes that improved staff's ability to keep clients safe.
